RELEASE NO: 00-26

## **Notice to Mariners: Target Missiles Being Launched November 14 and 15**

The NASA Wallops Flight Facility will support the U.S. Navy in the firing of 5 target missiles from Wallops Island over the Atlantic Ocean 9 a.m. to 5 p.m., Tuesday and Wednesday, Nov. 14 and 15. The areas in the Atlantic Ocean that pose a danger to mariners during the project are posted on the Boaters Launch Information page under the Wallops web site at [www.wff.nasa.gov](http://www.wff.nasa.gov). Boaters are asked to remain clear of these areas during operations.

Wallops will fly an orange aerostat (blimp) at 400 feet altitude over Wallops Island beginning at 30 minutes before the firings. The blimp will be lowered when the mission is completed and the danger to mariners no longer exists. In addition, boaters may tune to Marine Channel 12 to monitor the operations.

Completion of the mission will be noted on the Boaters Launch Information page on the Wallops web site as well as the Wallops launch status line at 757-824-2050.

Thank you for your assistance and support.
